

LSD Easy to Obtain

# Pitchess Seeks New Laws To Control Drug Menace

Sheriff Peter J. Pitchess today called for immediate legislation to control the sale of LSD. Pitchess called LSD "the nation's newest drug menace." He noted it is classified

by the U. S. Food and Drug Administration as an "experimental drug."

The experimental classification means it can legally be obtained only by qualified investigators who have filed for a research plan with the Food and Drug Administration, he said, but LSD is "relatively easy" for both students and adults to obtain. "A chemistry student with some basic laboratory equipment can conceivably prepare

the drug at home," Pitchess said.

PITCHESS cited the case histories of a 38-year-old secretary who developed a desire to take off her clothes in public after taking LSD and of one person who tried to jump off a bridge because he believed his mind and body to be separate so that his mind would live even if his body should die. Another, he commented,

simply said, "It was the most terrifying day of my life."

Medical authorities say the frightening loss of identity and control can result in an overwhelming, psychotic reaction: the mind is disorganized and deluded and tormented by feelings of distrust.

Dr. E. F. W. Baker of Toronto, Ontario, Canada, treated 150 mentally ill persons with LSD. Two weeks after use, one of them committed suicide, four experienced temporary schizophrenia, and four developed epileptic seizures, Pitchess said.

While medical researchers do not agree on the possible dangers posed by continued use of the drug, even under clinical conditions, all agree that the major threat is in any uncontrolled use, particularly by juveniles.

"There are no adequate laws to control the illicit possession or sale of LSD," Pitchess said. "Dangers of experimentation can perhaps be even more deadly than the so-called hard narcotics."

"We need immediate legislation to give local law enforcement agencies the necessary tools with which to control the unauthorized sale and use of this dangerous drug."
